**Padvish**  
**Android Enterprise**

Padvish Android Enterprise delivers enterprise-grade protection for Android devices, utilizing advanced threat detection and cutting-edge security technologies.

Integrated with the Padvish Management Console, this solution provides centralized, streamlined device management, ensuring scalable and efficient protection for enterprise environments.

---

## Padvish Android Enterprise

-  Centralized control and protection for all Android phones and tablets within the organization
-  Displaying real-time device status via the Padvish Management Console
-  Periodic statistical reports on device security through the Padvish dashboard
-  Organizing and managing device groups separately within the Padvish Management Console
-  Applying security settings remotely and centrally to ensure consistent protection across all devices

## Key Features and Capabilities

Freeing up device storage by removing unused files and optimizing memory

Detecting and blocking fraudulent banking portals with anti-phishing protection.

Scanning installed applications and files

Managing internet connections over Wi-Fi and mobile data, blocking unauthorized access to the internet

Extracting and displaying detailed information about installed applications on the device

Remotely track device location, lock it, or erase data in case of loss or theft

Managing your security is hard, Amnpardaz makes it easy

“Amnpardaz Software Corporation, operating under the Padvish brand, offers a comprehensive range of cybersecurity solutions tailored to safeguard both home and enterprise environments against evolving cyber threats”
