

Padvish®

**Padvish
Android**

Padvish Android Antivirus offers comprehensive protection for your Android devices, including smartphones and tablets, with a powerful set of security features.

It combines a robust firewall, anti-theft tools, advanced scanning options, and anti-phishing technology to guard against the latest cyber threats.

With Padvish Android, your personal data remains safe, ensuring your privacy is always protected.

Key Features of Padvish Android Antivirus

Junk Cleaner	 Freeing up device storage by removing unused files and optimizing memory.
Anti-Phishing	 Automatically detects fraudulent websites, including fake payment portals, to protect against phishing attacks.
Scan	 Four powerful scanning options to detect and remove malware and other security threats.
Firewall	 Managing internet connections over Wi-Fi and mobile data, blocking unauthorized access to the internet.
App Info	 Provides detailed information for all apps installed on your device.
Anti-Theft	 Remotely track device location, lock it, or erase data in case of loss or theft.
